

*Disconnected, discouraged,
disenabled? Let's code!*

We want your feedback!

What did you (or your students) like the most?

Flipped Classroom and learn by doing in Math classes, where very appreciated, as well as coding on Arduino Integrated Environment with sensors.

What did not go so well?

Pupils responsibility wasn't sometimes at high levels

What did you learn from your experience?

Math taught with a Learn By Doing (LBD) and Project Based Learning (PBL) strategy can be permanently brain-wired into pupils' minds, better than using other methodologies
